FIBERGLASS DOORS

BUILT FOR THE CANADIAN CLIMATE

Unsurpassed vertical integration and ISO 9001 / ISO 14000 monitored manufacturing processes help support the R&D team.

- **High impact** compression moulded fiberglass skins are "weatherproof" and will not delaminate, corrode, mold or mildew. Nan Ya fiberglass doors also do not dent, rust, warp, crack, split, splinter, or rot and are very easy to keep clean.
- **Waterproof composite stiles** and rails are sealed and beautifully finished to protect all edges of the door from moisture penetration which could harm the inner insulation. The composite material will not delaminate or splinter and boasts twice the screw-holding capacity of typical wood-edge doors. The top and bottom rails are also composite components that prevent water seepage, are easy to trim and pre-machined to accommodate the bottom weather sweep. This patented innovation protects every Designer Arch fiberglass door from moisture infiltration.
- **Full-length lock block** and more internal structure than any door of its kind in North America. This structural reinforcement also ensures added security against forced entry and provides incomparable stability.
- **Guaranteed;** Nan Ya backs every door with a 25 year limited manufacturer's warranty. Not only do they stand behind any manufacturing defects, they also warrant against 'thermal bow'.

FIBERGLASS

DOOR SLABS

Specifically designed to withstand the harsh Canadian climate.

Exceptional Security
Our full-length steel reinforced wood lock block offers exceptional security while allowing for a range of hardware mounting options.

Energy Efficiency
Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

Performance
Rigid structure prevents bowing and warping in extreme temperatures. The fiberglass skins are resistant to dents, dings, splintering, and corrosion.

Completely Waterproof
Our full-length composite stiles and rails provide complete waterproofing for the door's insulation. These stiles will not splinter like wood or delaminate like steel.

Composite Stile
LVL Reinforcing
Steel Reinforcing

CFC-Free Polyurethane Core
- Environmentally friendly – 100% CFC-free
- Rigid core to provide dimensional stability
- 6x more energy efficient than wood doors

Deeper Embossing Panel

Pre-pigmented smooth white skin requires no painting and will not yellow

Composite Rail

25 YEAR Limited Manufacturer's Warranty

Smooth white pre-pigmented fiberglass doors have a warm white finish to match the composite frame and require no painting. The doors will accept an array of paint colours to match the decor of your home.

Woodgrain textured fiberglass doors have a realistic rich appearance requiring paint or stain.

Brushed Grain White
The beautiful graining on this door can be painted or stained to match your décor.

BEADING

Flush glazed fiberglass slabs feature sleek lines, providing the perception of a more enhanced viewing area. Smooth white or oak woodgrain slabs are consistent from door edge to glass, incorporating the glass directly into the door and creating a look that is clean and uninterrupted.

The slab is manufactured as a one-piece open and beaded mould with glass installed directly into the door slab during the assembly process. The flush glazing keeps the unit water and weather resistant for years to come.
